

March 11 2019
St. Andrews Wesley Church Restorations
Week 5

This week in restorations you will see the 6 story scaffolds used to reach the very top of the arches.

You will also notice the etch glass has been removed at the Narthex end of the Sanctuary. The area where the organ console sits looks so big. You will also see that the original plaster is much lighter and brighter than the dirty, faded plaster that we are replacing. The sanctuary will be much brighter with the original colour.
