

July 2019 week 3

- 1) There are two conveyor belts that take the dirt that has been dug out of the mechanical room in the basement and dumps it into the bin for disposal
- 2) Everyday we are receiving more trucks of rebar for the crypt foundation
- 3) Look at how big that rebar is!
- 4) The rolls of tarping are secured on the scaffolding and pulled up over the roof trusses
- 5) That is a long way to have to pull up the tarping
- 6) Roof trusses from the lane
- 7) Roof trusses from St. Paul's Hospital

1 conveyor belt to move dirt from the mechanical room in the basement

*2 rebar for crypt*

*3 rebar for the crypt foundation*

*4 rolls of tarping for roof trusses*

*5 roof tarping on Nelson St.*

*6 roof trusses from the lane*

*7 roof trusses from St. Paul's*
