

March 4 2019
St. Andrews Wesley Church Restorations
Week 3

We found something very interesting when we removed the tiles in the sanctuary, small rectangular pieces of wood imbedded in the concrete. They were put there in order to have a place to screw in the pews! Back in the 1930's they did not have the tools to screw into concrete.

Flooring removed

Wood in floor to screw in pews

Tubes taking filtered air out of the sanctuary

Doors stored in hoarded chapel

Hoarding North Transept

Narthex with hoarded main door

Scaffolding on the outside
